

This short walk explores a piece of the Royal National Park, with lovely wildflowers in spring, and some great sandstone rock formations. The main highlight is the creek. Flat Rock Creek, as the name suggests, has a solid and flat bed. The rock is red in colour and the water flows across the width of the creek. This spot is great on a sunny day to contrast the blue sky with the red rock.

Royal National Park

Length: 0.3 km
Time: 15 mins
Climb: 21 m
Style: Return
Rating: Track: Moderate
Where: 7.3 km SSE of Loftus
Transport: car

Flat Rock Creek Car Park to Flat Rock Creek 0.1km 3 mins

(From S) From the Flat Rock Creek car park (West of Flat Rock Creek bridge, 6.6KM south of Audley on Sir Bertram Stevens Dr), this walk follows the track past the 'Flat Rock Creek' sign. Following the arrow down the rock the walk then winds through the bush passing some interesting rock formations and views of the creek. Just near the creek the track heads right to come to the bank of Flat Rock Creek. (The creek may be impassable after rain, and is slippery).

Flat Rock Creek

Flat Rock Creek is found south east of Audley and flows north under Sir Bertram Stevens Drive. In places the water is wide and shallow as it flows across the solid flat rock bed. The red rock and the shallow creek make for a very interesting environment. It is a nice cools spot to visit on hot days.

This is a 'Return' style walk - retrace your steps back to the beginning when you are ready.
